FAIR-IMPACT Open Calls

FAIR-IMPACT

Expanding FAIR solutions across EOSC

eosc

Aim of this Open Call

It can be challenging to know which FAIR-enabling tools and approaches to use for different purposes and how they should be implemented most effectively. The FAIR-IMPACT project will provide a set of clearly defined support actions that will help successful applicants learn how to use specific tools/methods/approaches, helping them start (or continue) their journey to becoming more FAIR-enabling and to being active contributors to the European Open Science Cloud (EOSC).

Who can apply?

Individuals, groups or organisations from public or private organisations, including:
- Research-performing organisations and research infrastructures
- Repositories, data and metadata service providers
- Representatives of national and international level initiatives

Why apply?

Successful applicants will benefit from:
- A tailored support package, including virtual workshops and expert guidance and advice from FAIR-IMPACT project partners to enable them to implement the particular tool or approach
- Financial support to enable participation
- The opportunity to share their knowledge and learn from their peers
- The opportunity to promote their work and outcomes of their participation in a FAIR-IMPACT Implementation Story

Key dates

This is the first of three Open Calls for support that FAIR-IMPACT will run (the second and third will take place in 2024 and 2025). Key dates for this first Open Call:

March 27 2023	Promotional webinar
March 27 2023	Call opened
June 5 2023	Deadline for applications
July 17 2023	Applicants selection/notification
