

**FAIR-IMPACT**

Expanding FAIR solutions across EOSC

FAIR Implementation  
Workshop :  
Open Access (OA) publishing  
in FAIR action plans

Tuesday 6 February, 10:00 - 12:00 CET  
FAIR IMPACT support for National Level  
Initiatives

## Workshop Agenda

Time	Topic	Speaker
15 min	Workshop introduction	Nina GRAU (INRAE)
45 min	Presentation of Open Access in publications	Margo BARGHEER (CRAFT OA)
10 min	Questions	All
40 min	Discussion	All
10 min	Next steps	Nina GRAU (INRAE)

## Technical details

- The **workshop will be recorded** and available on Youtube.

- If you have any questions, please **write them in the chat and raise your hand** during the question period.

- Please **switch off your microphone** during presentations.

## Expanding FAIR Solutions across Europe

**Call  
HORIZON-INFRA-2021-E  
OSC-01-05**

*Enabling discovery and  
interoperability of federated  
research objects across  
scientific communities*

**Expanding FAIR  
solutions in Europe**

**Partly following up on  
FAIRsFAIR**

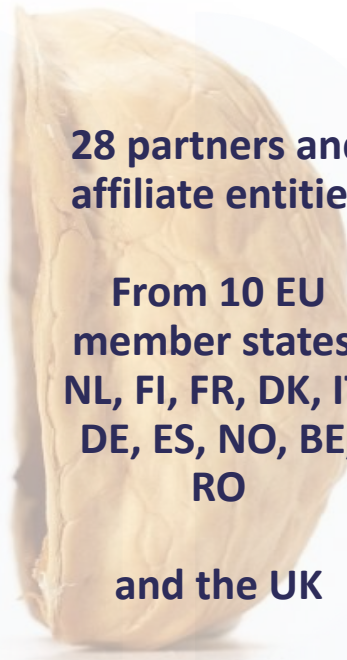

**EU funded project**

**Coordination and  
Support Action**

**10 million euro**

**36 months, starting  
1 June 2022**

**28 partners and  
affiliate entities**

**From 10 EU  
member states:  
NL, FI, FR, DK, IT,  
DE, ES, NO, BE,  
RO**

**and the UK**

## FAIR-IMPACT overall objective

### WHAT:

to realise a FAIR EOSC by **supporting the implementation** of FAIR-enabling practices across scientific communities and research outputs at a European, national, and institutional level;

### HOW:

- **identifying** current and emerging components for enabling FAIR (practices, policies, tools & technical specifications);
- **translating** viable solutions, guidelines and frameworks that have been developed for one domain or research output and **supporting** their application in others;
- taking the next step in implementation by **defining** the support, governance, and coordination mechanisms required to ensure the continuous function of FAIR-enabling practices in the EOSC.

## Introduction to FAIR national initiatives support programme

**A focus on methodology:**

**At country level, how can we develop a FAIR implementation action plan?**

Workshop series on  
**targeted topics**

# Main objective: to draft a FAIR implementation action plan

1. Objectives

2. Actions

3. Milestones

4. Roles & responsibilities

5. Priority

# Workshops detailed planning

## Introduction to today's keynote speaker

**Margo Bargheer**

Head of the team for electronic publishing at Göttingen University  
Library

Expert in University Press, University's repositories and the  
Diamond open access journal platform

# Introduction to today's topic: Open Access publishing in FAIR action plans

Open Access publication:  
less financial, legal or  
technical barriers to  
accessing it

Publications  
available for  
different types of  
readers  
(researchers,  
journalists, citizens)

Increases the visibility  
and reuse of  
academic results.

## Open discussion on the two models

## Next steps

eosc

# Open Access Publishing in FAIR Action Plans

FAIR Implementation Workshop :  
Open Access (OA) publishing in FAIR action plans

Funded  
by the  
European  
Union

06 | 02 | 2024 by Margo Bargheer

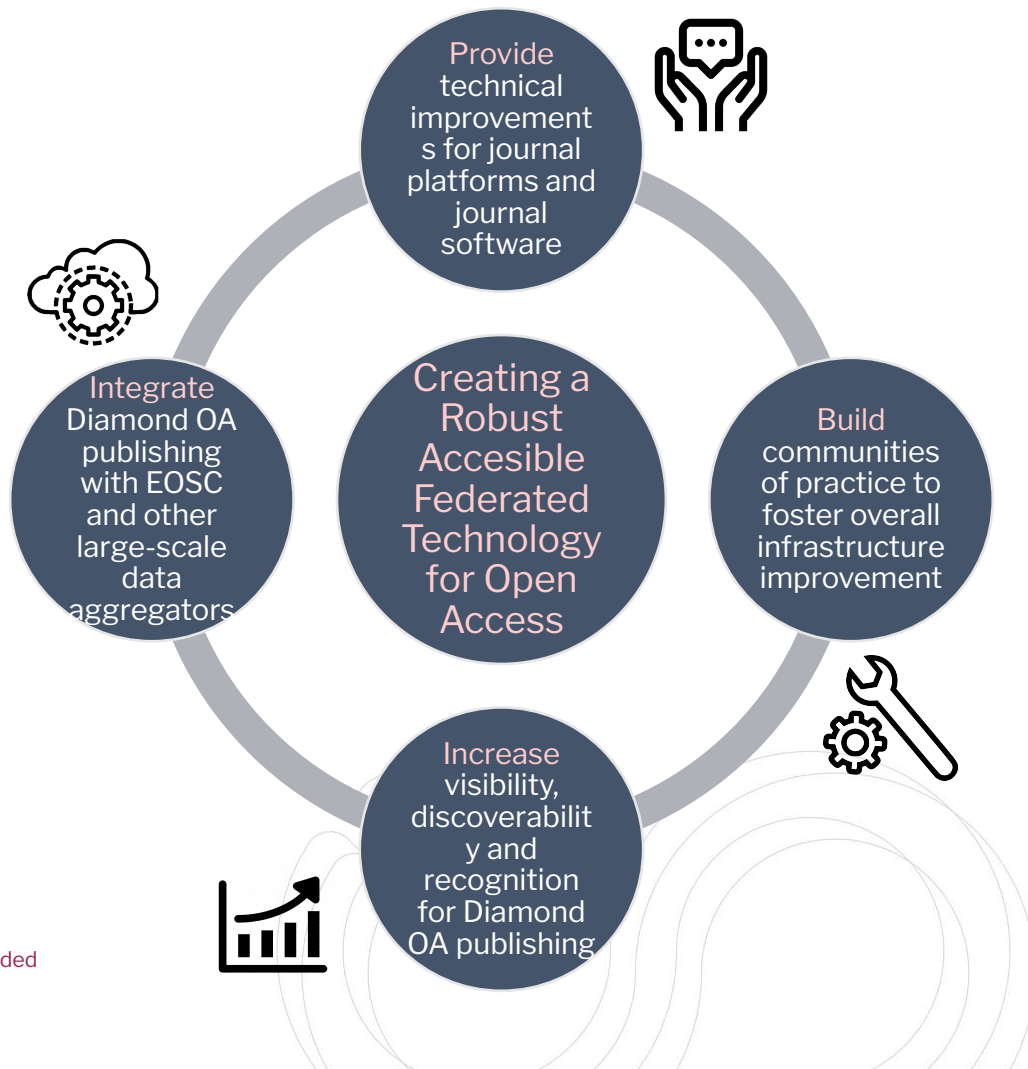

# What to expect from today's talk

- Brief introduction into the CRAFT-OA project
- What we mean by Diamond Open Access
- Expanding the concept of „research object“ in the EOSC by using a case study from medical research and library science
- FAIR-ifying publications
- FAIR action plan potentials in Germany

- Start 01 Jan 2023
- End 31 Dec 2025
- Budget of ~5 mill EUR
- 23 Partners from 14 European countries (plus affiliated entities)
- Göttingen University Library is coordinator on behalf of OPERAS Community
- Partner project DIAMAS (joint advisory board)
- Consortium consists of experienced stakeholders and service providers in open science and open access scholarly publishing, especially around institutional Diamond\* Open Access, IPSP (institutional publishing service providers)

\*Diamond OA: institution-funded publishing infrastructure for open access publications, no author-facing charges)

# Key Contributions to EOSC SRIA

- Contribution of Project CRAFT-OA

1

Ensure that Open Science practices and skills are rewarded and taught, becoming the 'new normal'

- Publishing “done right” is intrinsic to a paradigm shift towards open science
- Publishing under institutional governance as the “lab” for bringing open science to the public
- Rewards for open science require recognition -> no information loss during publishing -> platforms fit for purpose
- Technical maturity as an economy of scale to free potential for research

Tenure & Promotion

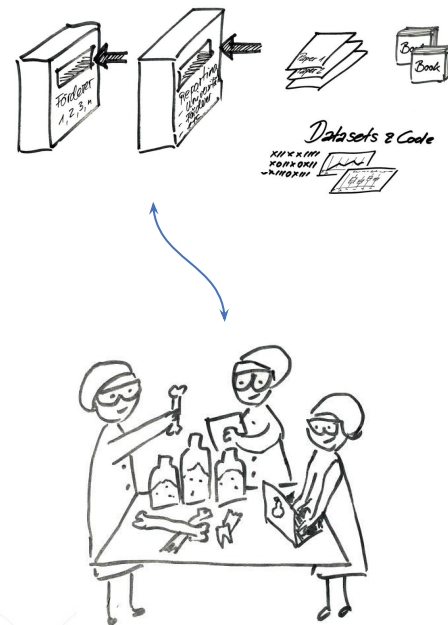

# Key Contributions to EOSC SRIA

- Contribution of Project CRAFT-OA

2

Enable definition of standards, development of tools & services, to allow researchers to find, access, reuse & combine results

- Publishing “done right” enables FAIR
- Interoperability of platforms requires standardised and enriched (meta)data
- Multilingualism should not be a blocker to mash and reuse
- Clear license situation enables reuse

# Key Contributions to EOSC SRIA

- Contribution of Project CRAFT-OA

3

Establish a sustainable and federated infrastructure enabling open sharing of scientific results

- Publishing “done right” enables federated infrastructures and shared knowledge
- Science should define the features of its publishing system to bring a cultural shift towards sharing
- Technical maturity is prerequisite for federated infrastructures
- Technical maturity is prerequisite for sustainability

# Key impacts and deliverables

- Enabling smaller journals to be indexed in widest range of data aggregations
- Clear technical standards as a roadmap for technical maturity, interoperability and sustainability
- Living Handbook for journal platform operation
- two summer schools for journal managers with reusable curriculum
- Building networks of IPSPs
- Diamond Discovery Hub to enhance visibility and recognition of Diamond Open Access content, journals, platforms and service provider
- Onboarding of Diamond Open Access IPSPs into the EOSC
- Building the Diamond Open Access capacity centre

# CRAFT-OA collaborates and aligns with

## Partners of the Consortium

- OpenAIRE AMKE (research graph, tools, data enhancement, EOSC onboarding)
- CoalitionS (policy building, PlanS)
- Directory of Open Access Journals (basic publishing infrastructure)
- OPERAS AISBL (sustainability, connection to HSS communities)
- EGI (AAI infrastructure, EOSC onboarding)
- Association of European University Presses (scholarly communities, networking editors and publishers)
- EOSC Association

## Representatives in the joint advisory board

- PKP (release management of OJS, community building)
- Lyris (release management of Dspace, community building)

## Sister projects and initiatives

- Project DIAMAS – Developing institutional Open Access Publishing Models to Advance Scholarly Communication, with EQSIP - Extensible Quality Standard for Institutional Publishing)
- Project PALOMERA– Policy Alignment of Open Access Monographs in the European Research Area
- And many more

# Vision? Making Institutional Diamond Open Access a default!

- Creating a trusted and federated system for scholarly publishing,
- sustainable and governed by science itself
- Contributing to open science paradigms,
- Making FAIR the default in open access publishing
- Bringing institutional publishing and HSS into the EOSC

The screenshot shows a press release from the European Council. The header includes the European Council logo and the text 'European Council Council of the European Union'. The breadcrumb trail is 'Home > Press > Press releases'. The date and time are '23 May 2023 10:27'. The main title is 'Council calls for transparent, equitable, and open access to scholarly publications'. The text states: 'Today the Council has adopted conclusions on the 'high quality, transparent, open, trustworthy and equitable scholarly publishing', in which it calls for immediate and unrestricted open access in publishing research involving public funds.' A quote from Mats Persson, Swedish Minister for Education, Ministry of Education and Research, is included: 'If we really believe in open science, we need to make sure that researchers can make their findings available and re-usable and that high-quality scientific articles are openly accessible to anyone that needs to read them. This should be particularly the case for research that benefits from public funding: what has been paid by all should be accessible to all.'

NOTES that the current system of scholarly publishing is operated by various for-profit and not-for-profit organisations and RECOGNISES with concern that the increasing costs of paywalls for access to scientific publications and for scholarly publishing cause inequalities and are becoming unsustainable for public research funders and institutions accountable for the spending of public funds, decreasing funding available for research;

HIGHLIGHTS the importance of not-for-profit, scholarly open access publishing models that do not charge fees to authors or readers and where authors can publish their work without funding/institutional eligibility criteria; NOTES the variety of models that do not depend on article processing charges or similar per-unit charges and STRESSES the importance of supporting the development of such models led by public research organisations;

# Case study „Systematic Review“

## Research Question

What barriers exist in science communication about research involving AE?

### Search String (13.10.2023) <sup>1</sup>

("science communicat\*" OR "science journali\*" OR "science translation"  
 OR (("science" OR "research") NEAR/2 ("populari\$ation" OR "outreach"))  
 OR ("public" NEAR/2 ("outreach" OR "communicat\*" OR "engage\*" OR "involvement" OR  
 "understand\*"))))  
 AND (("animal\$" OR "organism\$" OR "mouse" OR "mice" OR "fish" OR "rat\$" OR "cattle" OR  
 "amphibian\$" OR "carnivore\$" OR "livestock" OR "primate\$" OR "fundamental")  
 NEAR/1 ("research\*" OR "experiment\*" OR "test\*" OR "model\*" OR "lab\*" OR "toxic\*" OR  
 "conservation")  
 OR "GM technolog\*" OR "xenotransplant\*")

### Databases

Search service	Databases	Search fields	Results	References
Web of Science	Core Collection & MEDLINE	Topic (title, abstract, indexing)	270	(Davis Styliniski et al., 2020; Fage-Butler et al., 2022; Fraaije et al., 2022)
EBSCOhost	PsycInfo & ERIC	Title OR abstract OR subject terms	32	(Kranz et al., 2022; Nguyen & Tran, 2019)
Scopus		[planned, not yet tested]		(Fage-Butler et al., 2022; Fraaije et al., 2022)

### Screening criteria

<b>Inclusion</b>	<ol style="list-style-type: none"> <li>1. The research referred to in the paper involves animal experimentation.<sup>2</sup></li> <li>2. External science communication<sup>3</sup> about said research is addressed.</li> <li>3. The paper is published in English.</li> </ol>
<b>Exclusion</b>	<ol style="list-style-type: none"> <li>4. Only internal science communication is addressed (e.g., Henderson et al., 2020).</li> </ol>

## Strategy for including keywords

Keywords are compiled by scoping the literature (e.g., Treue et al., 2023 for animals used in research). They are then tested in Web of Science. Two metrics are considered when deciding which keywords are included into the search string: 1) they must improve **recall**, i.e., yield additional relevant papers and 2) they must not worsen **precision** too much, i.e., yield way more irrelevant papers than relevant ones. The relevance of papers are determined by the screening criteria.

How many retrieved items are relevant?

Precision =

How many relevant items are retrieved?

Recall =

(‘Precision and Recall’, 2023)

Table 1.

The Cochrane Collaboration's Tool for Assessing the Risk of Bias [28]

	produce comparable groups.	
Allocation concealment	Describe the method used to conceal the allocation sequence in sufficient detail to determine whether intervention allocations could have been foreseen in advance of, or during, enrollment.	Selection bias (biased allocation to interventions) due to inadequate concealment of allocations prior to assignment.
Blinding	Describe all measures used, if any, to blind study participants and personnel from knowledge of which intervention a participant received.	Performance bias due to knowledge of the allocated interventions by participants and personnel during the study.
	Describe all measures used, if any, to blind study outcome assessors from knowledge of which intervention a participant received.	Detection bias due to knowledge of the allocated interventions by outcome assessors.
Incomplete outcome data	Describe the completeness of outcome data for each main outcome, including attrition and exclusions from the analysis. State whether attrition and exclusions were reported, the numbers in each intervention group, reasons for attrition/exclusions where reported, and any re-inclusions in analyses performed by the review authors.	Attrition bias due to amount, nature, or handling of incomplete outcome data.
Selective reporting	State how the possibility of selective outcome reporting was examined by the review authors, and what was found.	Reporting bias due to selective outcome reporting.
Other bias	State any important concerns about bias not addressed in the other domains in the tool.	Bias due to problems not covered elsewhere in the table.
	If particular questions/entries were prespecified in the reviews protocol, responses should be provided for each question/entry.

### What is the OpenAIRE Graph?

The OpenAIRE Graph is a free and open resource that brings together and interlinks hundreds of millions of metadata records from over 70k data sources trusted by researchers.

The project broke ground in 2012 being one of the first research knowledge graphs and has now grown into one of the world's largest and is the authoritative source for the European Open Science Cloud (EOSC). Here, researchers, communities, institutions, companies, and citizens thrive by freely sharing research products and related information.

# eosc FAIR Open Access on the Rise

- German Research Foundation launches 9 mill EUR call to strengthen Diamond Open Access
- National Ministry for Research and Education with clear Open Access Policy

Share knowledge.  
Strengthen the community.
